skills

Experienced: Ruby, Rails, Javascript, CSS, TDD, Minitest, RSpec, Selenium, Git

Competent: Unix, SQL, Angular, React, Agile

Familiar: Java, Android, Puppet, Capistrano, Elixir, EmberJS, BackboneJS

experience

Freelance / Side Project, NemCo LLC, Jan 2016 - now

- Worked with small business owner to design, implement, and deploy a mobile-responsive Rails app to streamline scheduling, field work, and invoicing.

Software Developer, Pivotal Labs, Jul 2015 - now

- Significant work on two applications: a medical equipment commerce application written in Angular, Rails; a mobile-first financial application in React, Rails.
- Significantly reduced test run time through parallelization and other optimizations.
- Reviewed and improved error handling around payments system to handle unexpected failure conditions.
- Worked to find technical and procedural improvements around errors due to poorly communicated changes in inter-department microservices.

Sr. Software Developer, AppFolio, Apr 2013 - Jun 2015

- Spearheaded, established, and maintained a formal onboarding process for new hires to help the engineering team quadruple in size over two years. Received AppFolio's "Shout Out" award for my work.
- Architected a modular system to reconcile commercial accounting charges as part of a new product designed for commercial customers.
- Based on conversations with customer service, organized and led development to upgrade an older, buggy part of the app that generated customer complaints.
- Won 3 of 4 categories (*Most Innovative*, *Most Useful to Company*, *Best in Show*) at cross-departmental Hackathon for a solo project demonstrating an in-app help system.
- Excerpts from anonymous yearly peer reviews:
 - "...keeps the customer's pain point and needs as a focal point."
 - "Major contributor to any team he is a part of."
 - "...helps the team's productivity and morale."

Intern / Contract Developer, Burnside Digital, Oct 2012 - Mar 2013

- Implemented a drag-and-drop, nested templating system for a BackboneJS medical application with a Rails backend.

Mathematics Teacher, Community College & Public High Schools, 2005 - 2012

education

Master of Mathematics, The University of Montana, 2010

Master of Teaching, Grad. School of Ed., Lewis & Clark College, 2005

BA, Mathematics, Lewis & Clark College, 2004

fun facts

Biked from FL to NC. Hosted a Parcheesi marathon. Able to recite African countries in 2 breaths. Was left behind on a middle school field trip.
